DORIAN GUZMAN

Strategy · Agentic AI Systems · Quantitative Research

Amsterdam, Netherlands

dorianeguzman@gmail.com | +49 157 39511230 | linkedin.com/in/dorianguzmanrazo | dorianguzman.github.io

PROFESSIONAL SUMMARY

AI systems developer with deep expertise in building autonomous multi-agent systems and quantitative infrastructure. Combines technical depth (PhD in Data Science, focus on optimization algorithms) with business strategy (MBA from University of St. Gallen) to architect and deploy production AI solutions. Track record includes developing agentic pipelines producing 100+ assets/week, building market-making engines for DeFi, and leading data science teams across finance, energy, marketing, and compliance verticals. Takes AI systems from research to production at scale.

PROFESSIONAL EXPERIENCE

NXT Partners AI *April 2026 – Present*

Co-Founder

Remote

- Architected multi-agent AI systems for content automation, compliance platforms, and regulatory intelligence with autonomous pipelines producing 100+ assets/week using LLMs, computer vision, and orchestration frameworks
- Developed algorithmic trading systems and market-making engines for crypto/DeFi with low-latency execution, plus quantitative models for risk management and energy forecasting using genetic algorithms
- Led full-stack AI product development from architecture to production deployment, shipping AI-powered dashboards and analytics platforms across finance, energy, media, and regulatory verticals
- Advised enterprises on AI transformation strategy, workflow optimization, and AI-native organizational restructuring

Deep Q Digital *November 2023 – April 2026*

Quantitative Researcher

Remote

- Built P&L tracking and risk management systems for DeFi trading operations with real-time position monitoring, performance analytics, and automated reporting across multiple protocols and chains
- Developed backtesting infrastructure for quantitative trading strategies, implementing simulation engines, historical data pipelines, and performance evaluation frameworks to validate strategies before deployment
- Executed live trading operations in crypto markets, building and maintaining trading systems with low-latency execution, order management, and integration with multiple exchanges and DeFi protocols
- Designed and deployed infrastructure for quantitative operations, setting up data pipelines, monitoring systems, and deployment workflows to support high-frequency trading and DeFi strategy execution

SmartHelio (YC W22) *May 2021 – April 2023*

Head of Data Science (promoted from Data Scientist)

Lausanne, Vaud, Switzerland

- Led international data science team building ML fault detection and digital twin algorithms for solar systems. Defined data strategy, managed product portfolio, and collaborated with Swiss universities on R&D to reduce O&M costs across Europe and Asia

Fraunhofer Institute for Solar Energy Systems ISE *February 2017 – February 2021*

Project Manager & Data Scientist

Freiburg, Germany

EDUCATION

University of St. Gallen (HSG) *August 2022 – August 2024*

Master of Business Administration (MBA)

St. Gallen, Switzerland

- Focus on international management, leadership, corporate finance, and executive strategy
- Thesis: "Risk Management for DeFi Liquidity Provisioning"
- Developed practical skills in navigating different cultures and business environments, motivating and inspiring teams, and making sound decisions in a constantly changing business environment

University of Freiburg *February 2018 – Present*

PhD Candidate, Data Science (Thesis submitted 2025, defense pending)

Freiburg, Germany · In collaboration with Fraunhofer ISE

- Focus: Time-series PV power forecasting, optimization algorithms, digital twinning for solar energy systems (ALPRO project)

EIT InnoEnergy PhD School *April 2018 – March 2021*

PhD Candidate – Energy Economics, Smart Grids, Managing Innovation & Entrepreneurship

DTU – Technical University of Denmark *2019*

Guest PhD, Data Analysis and Optimization

Technische Universität Berlin *2013 – 2016*

Master of Science, Global Production Engineering – Solar and Wind Energy Technologies

Berlin, Germany · Thesis on thin film PV module performance models (Grade 1.3)

Tecnológico de Monterrey (ITESM) *2006 – 2010*

Bachelor of Science, Mechatronics

Morelia, Mexico · Exchange: Universidad de Las Palmas de Gran Canaria, Spain

TECHNICAL SKILLS

AI & Machine Learning:
Agentic AI Systems, Multi-Agent Systems, Large Language Models (LLM), AI Orchestration, Machine Learning, Model Optimization

Quantitative & Analytics:
Quantitative Research, Time Series Forecasting, Optimization Algorithms, Statistical Modeling, Econometrics, Predictive Analytics, Risk Management

Programming & Frameworks:
Python, React.js, FastAPI, Node.js, Go, Pandas, NumPy, SQL, Version Control (Git)

Cloud & Infrastructure:
Amazon Web Services (AWS), Google Cloud Platform (GCP), Cloudflare, Cloud Firestore

Blockchain & DeFi:
Digital Assets, Cryptocurrency Trading, DeFi Protocols, Smart Contracts, Market Making

Data & Analytics Tools:
Data Visualization, Data Analytics, Statistical Data Analysis, SQL, Microsoft Office, Jira

Domain Expertise:
Renewable Energy, Solar Energy Systems, Energy Forecasting, Project Management, Strategy Consulting

Business & Leadership:
AI Strategy, Digital Transformation, Business Development, Stakeholder Management, Team Leadership, Strategic Initiatives

LANGUAGES

English (Fluent), Spanish (Native), German (B1 - Intermediate)
