

DORIAN GUZMAN

Agentic AI Systems · Forward Deployed AI · Enterprise GenAI

Amsterdam, Netherlands

dorianeguzman@gmail.com | +49 157 39511230 | linkedin.com/in/dorianguzmanrazo | dorianguzman.github.io

PROFESSIONAL SUMMARY

AI builder and strategist specialising in deploying agentic systems within enterprise client environments. Combines deep technical execution (multi-agent systems, pipeline orchestration, MCP, vector databases, LLM observability) with business strategy to lead technical discovery and translate deployment realities into scalable solutions. PhD candidate in Data Science (optimization) and MBA from University of St. Gallen. Track record spans finance, media, compliance, regulatory, energy, and manufacturing verticals, taking AI from prototype to production on Google Cloud.

PROFESSIONAL EXPERIENCE

NXT Partners AI

April 2026 – Present

Co-Founder

New York, United States · Remote

- Architected and deployed multi-agent AI systems within client environments across content automation, compliance, and regulatory intelligence, using custom pipeline orchestration, LLMs, computer vision, and MCP to deliver autonomous workflows producing 100+ assets/week
- Led full-stack AI product development from technical discovery with business stakeholders through to production deployment, shipping AI-powered platforms across finance, energy, media, and regulatory verticals, resolving integration complexity and data readiness blockers
- Advised enterprises — including private equity funds — new to AI on transformation strategy and agentic AI requirements, embedding with client teams to redesign workflows and deliver their first production-grade solutions

QStarlabs.ai

April 2025 – April 2026

Lead Product Engineer

New York, United States · Remote

- Joined as Lead Product Engineer for Personas, an enterprise AI agent platform enabling clients to create and deploy multimodal AI micro-influencers running autonomously across social media to execute scalable campaigns and drive brand engagement
- Co-led technical strategy: designed, built, and implemented production-grade agentic systems integrating 1st-party and 3rd-party model providers, vector databases, and MCP into a unified enterprise platform
- Embedded with enterprise clients to drive adoption, manage technical onboarding, and translate deployment realities into product improvements

Deep Q Digital

November 2023 – April 2026

Quantitative Researcher

New York, United States · Remote

- Built quantitative trading infrastructure for DeFi including P&L tracking, risk management, real-time position monitoring, backtesting engines, simulation frameworks, and automated performance reporting
- Executed live high-frequency trading operations across crypto markets and DeFi protocols, maintaining low-latency execution systems, order management, and deployment and monitoring workflows

SmartHelio (YC W22)

May 2021 – April 2023

Head of Data Science (promoted from Data Scientist)

Lausanne, Vaud, Switzerland

- Led international data science team as Product Owner, building ML fault detection and digital twin algorithms; defined data strategy and managed product roadmap across Europe and Asia

EDUCATION

University of St. Gallen (HSG)

August 2022 – August 2024

Master of Business Administration (MBA)

St. Gallen, Switzerland

- Focus on international management, leadership, corporate finance, and executive strategy
- Thesis: "Risk Management for DeFi Liquidity Provisioning"

University of Amsterdam

February 2018 – Present

PhD Candidate, Data Science (Thesis submitted 2025, defense pending)

Amsterdam, Netherlands · In collaboration with Fraunhofer ISE

- Focus: Time-series PV power forecasting, optimization algorithms, digital twinning for solar energy systems (ALPRO project)

EIT InnoEnergy PhD School

April 2018 – March 2021

PhD Candidate – Energy Economics, Smart Grids, Managing Innovation & Entrepreneurship

DTU – Technical University of Denmark

2019

Guest PhD, Data Analysis and Optimization

Technische Universität Berlin

2013 – 2016

Master of Science, Global Production Engineering – Solar and Wind Energy Technologies

Berlin, Germany

Tecnológico de Monterrey (ITESM)

2006 – 2010

Bachelor of Science, Mechatronics

Morelia, Mexico

TECHNICAL SKILLS

AI & Machine Learning:

Agentic AI Systems, Multi-Agent Systems, Large Language Models (LLM), Pipeline Orchestration, MCP (Model Context Protocol), Vector Databases, LLM Evaluation Pipelines, LLM Observability, Machine Learning, Model Optimization

Quantitative & Analytics:

Quantitative Research, Optimization Algorithms, Statistical Modeling, Risk Management

Programming & Frameworks:

Python, React.js, FastAPI, Node.js, Go, Pandas, NumPy, SQL, Version Control (Git)

Cloud & Infrastructure:

Google Cloud Platform (GCP), Vertex AI, Gemini API, Cloud Run, Cloud Build, Amazon Web Services (AWS), Cloudflare, Cloud Firestore

Domain Expertise:

Renewable Energy, Enterprise AI Deployment, DeFi, Cryptocurrency Markets, Project Management, Strategy Consulting

Business & Leadership:

AI Strategy, Digital Transformation, Business Development, Stakeholder Management, Team Leadership, Strategic Initiatives

LANGUAGES

English (Fluent), Spanish (Native), German (B1 - Intermediate)
